

KEEPING SEALS SAFE

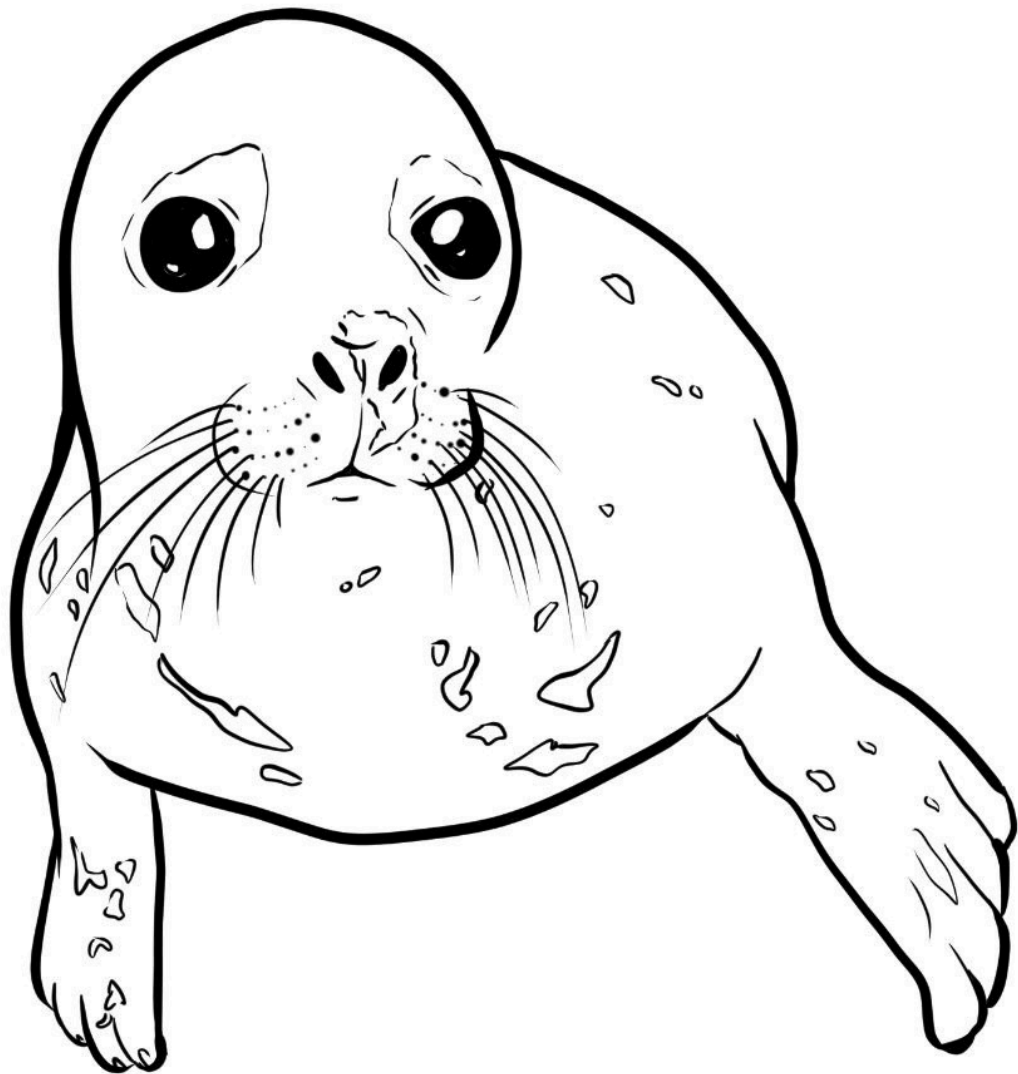

Have you ever seen a seal?

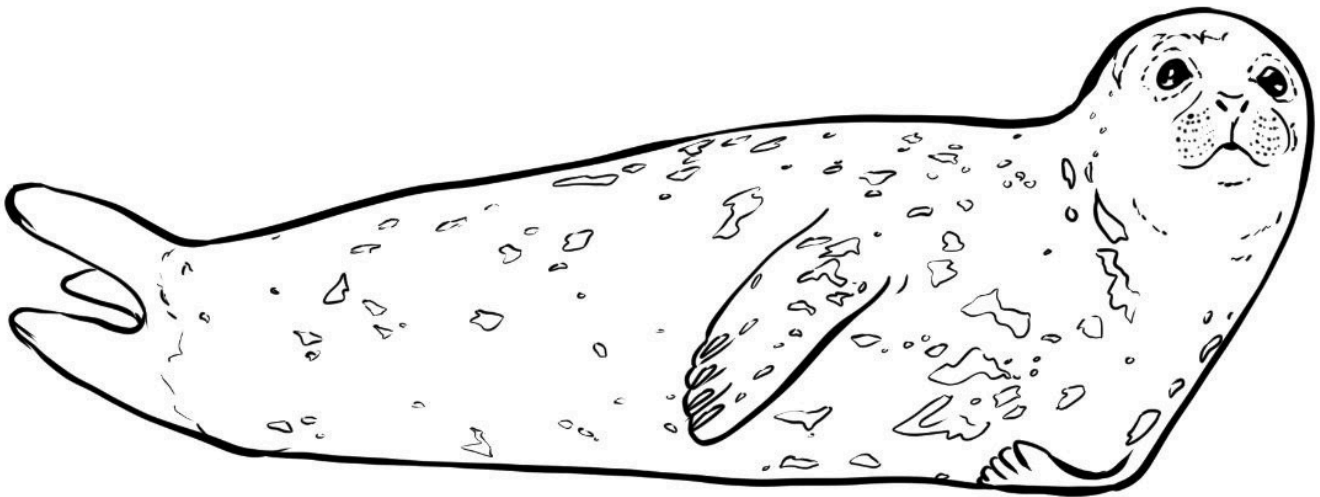

TwistedOrca.com

**Seals are marine mammals.
They can be found on both
land and sea!**

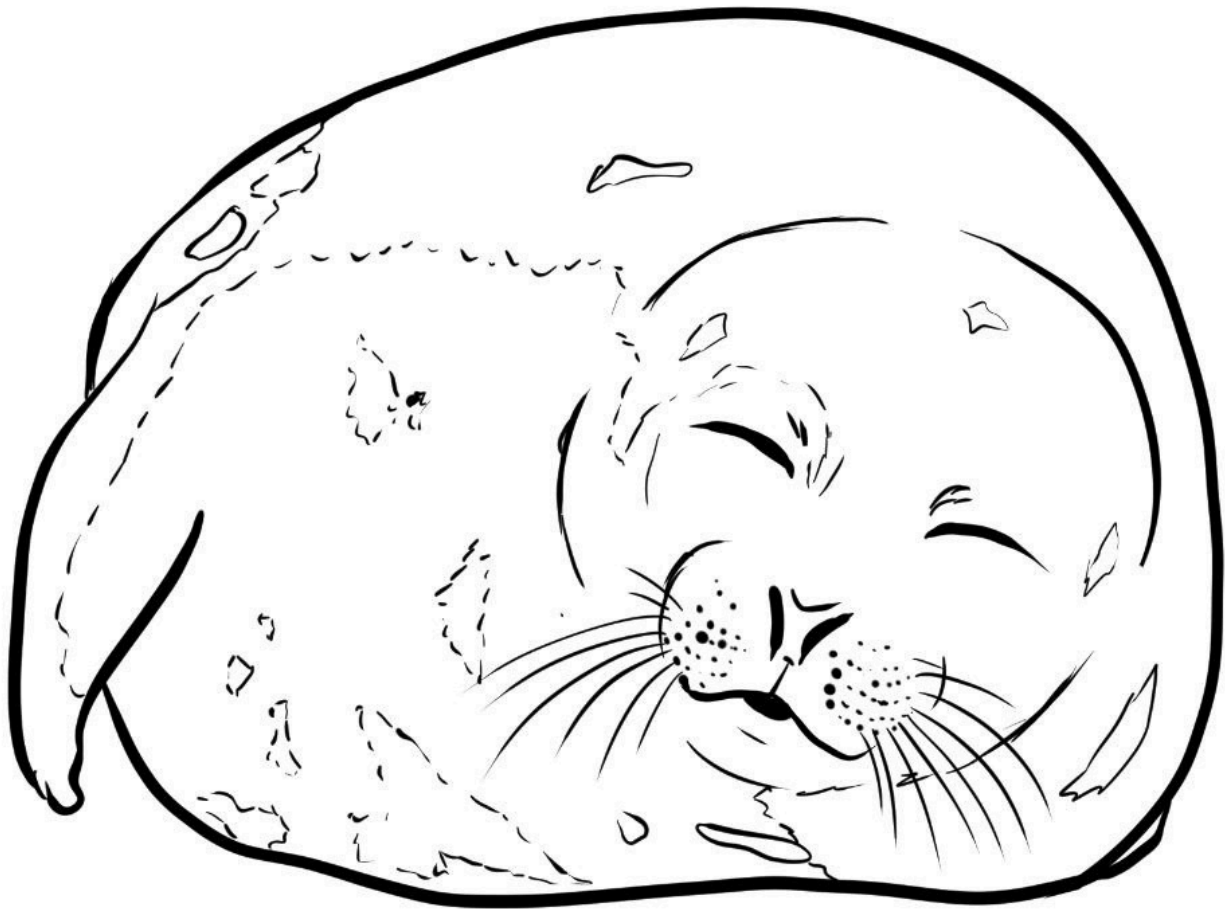

**Seals have flippers instead of feet.
This helps them be great swimmers!**

**To move on land, seals flop on their
bellies like caterpillars.**

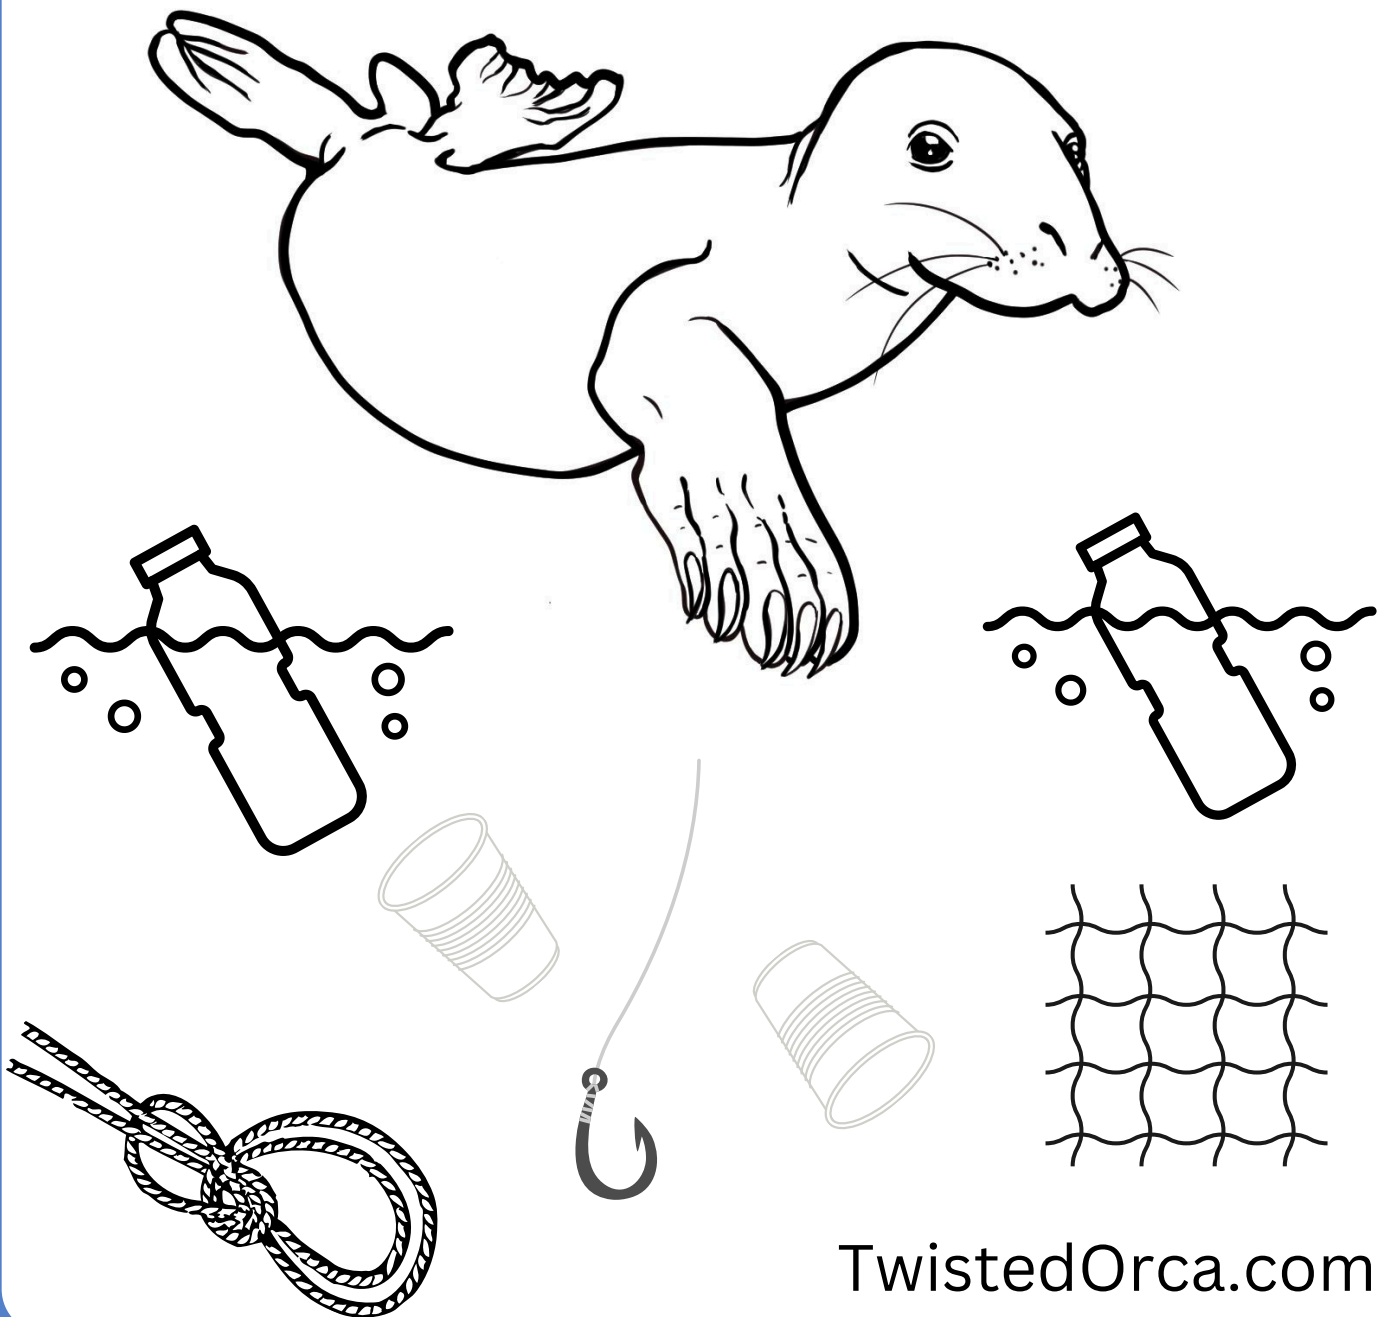

**Everyone can help seals stay
safe and healthy!**

TwistedOrca.com

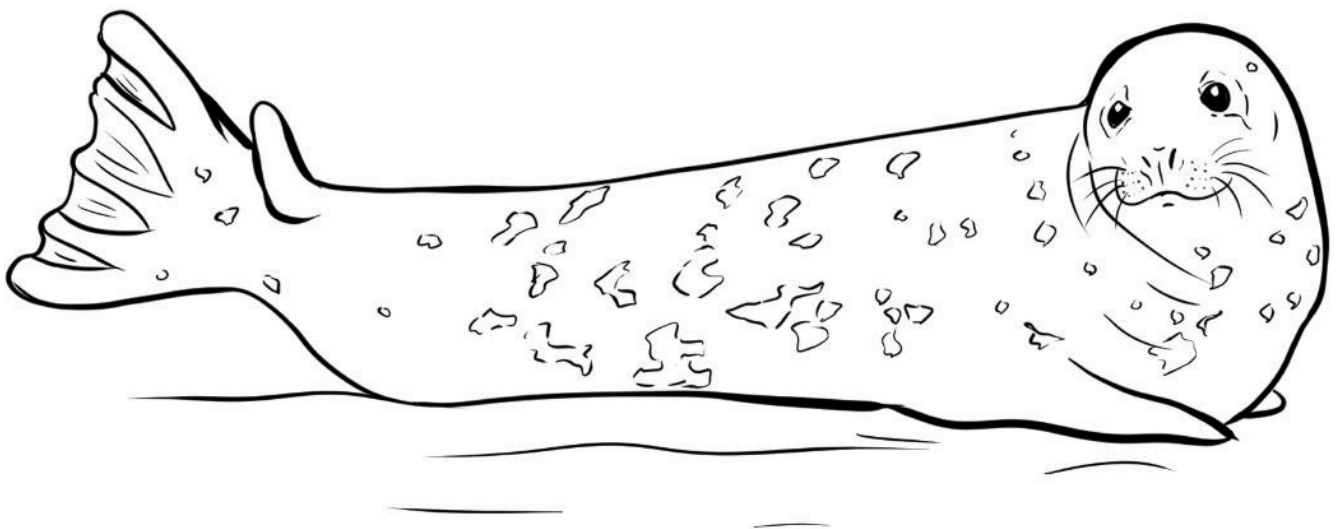

**Keeping trash out of the ocean
is one way to help seals stay safe!**

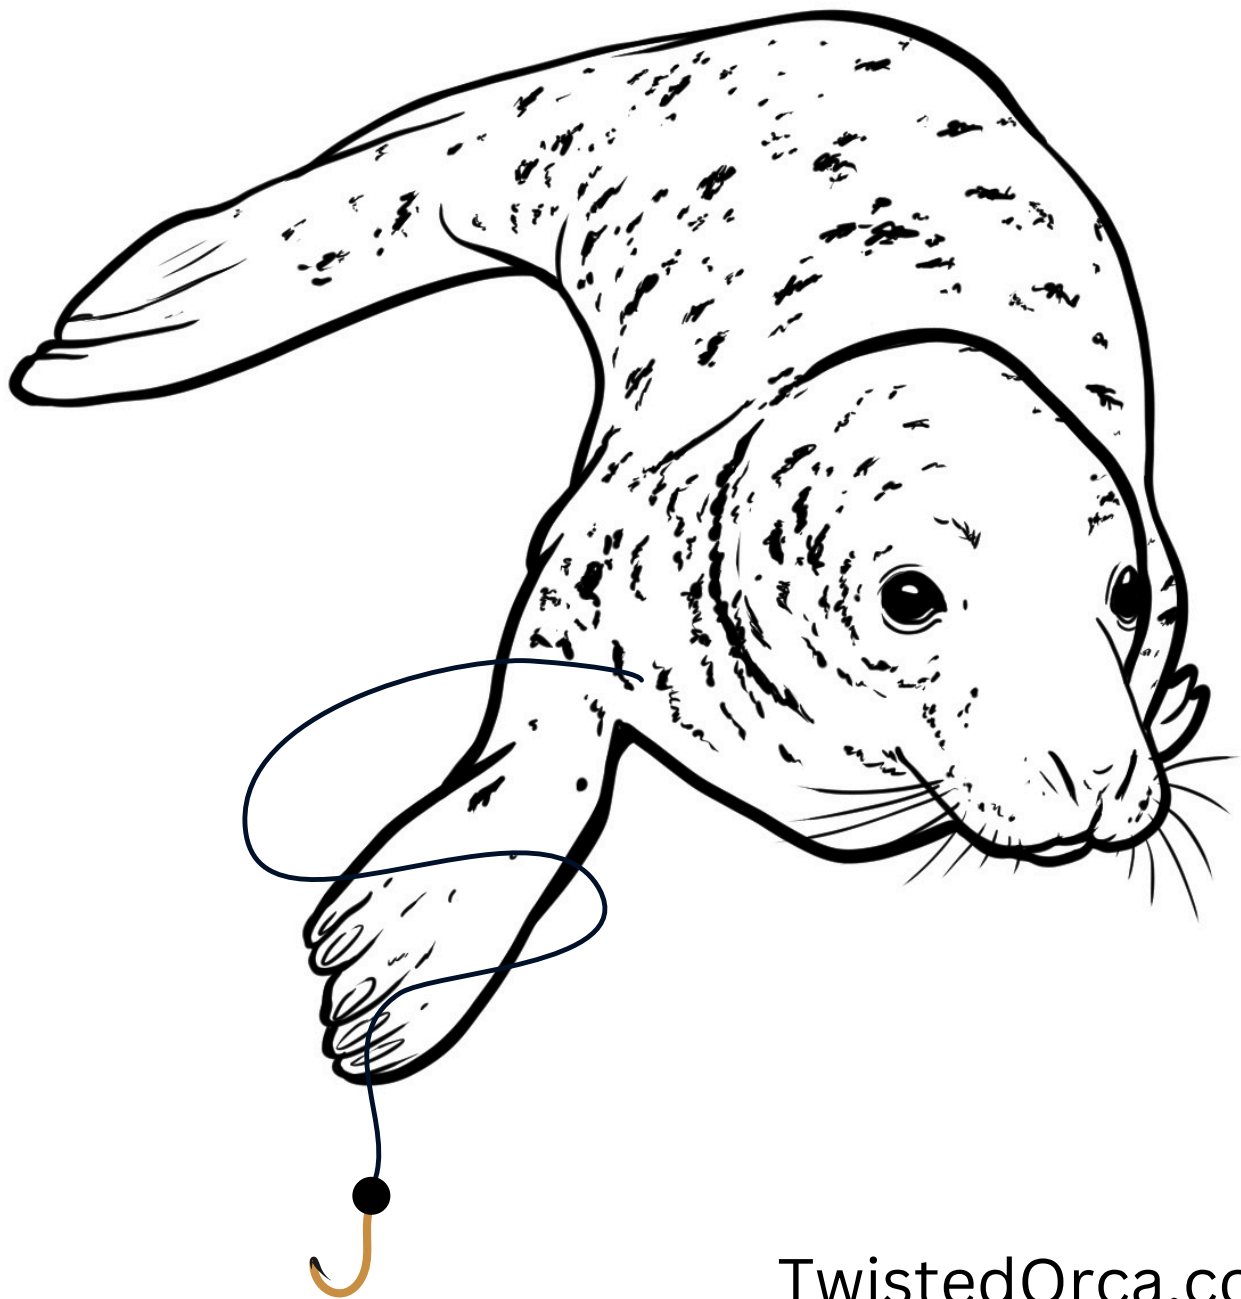

TwistedOrca.com

**It is important to give
seals lots of space!**

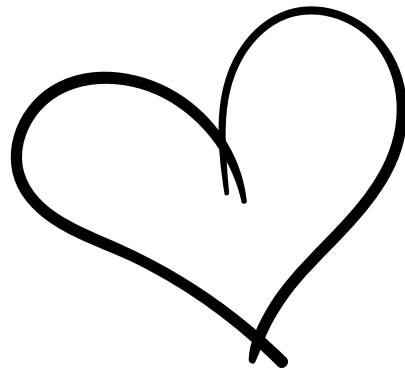

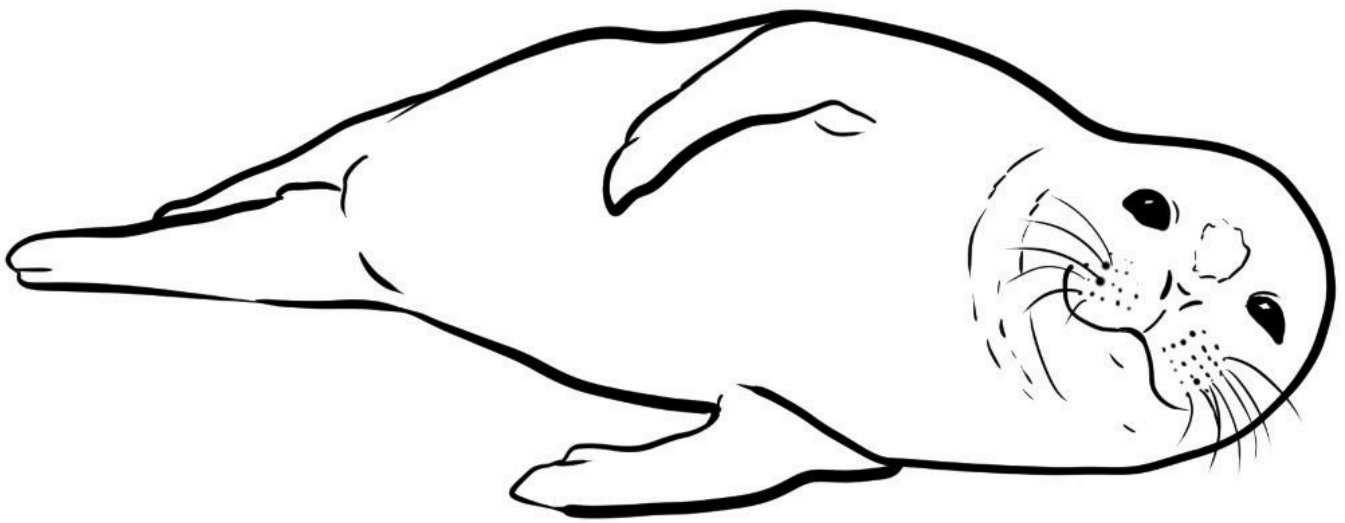

**Stay 150 Feet
Away From
Seals**

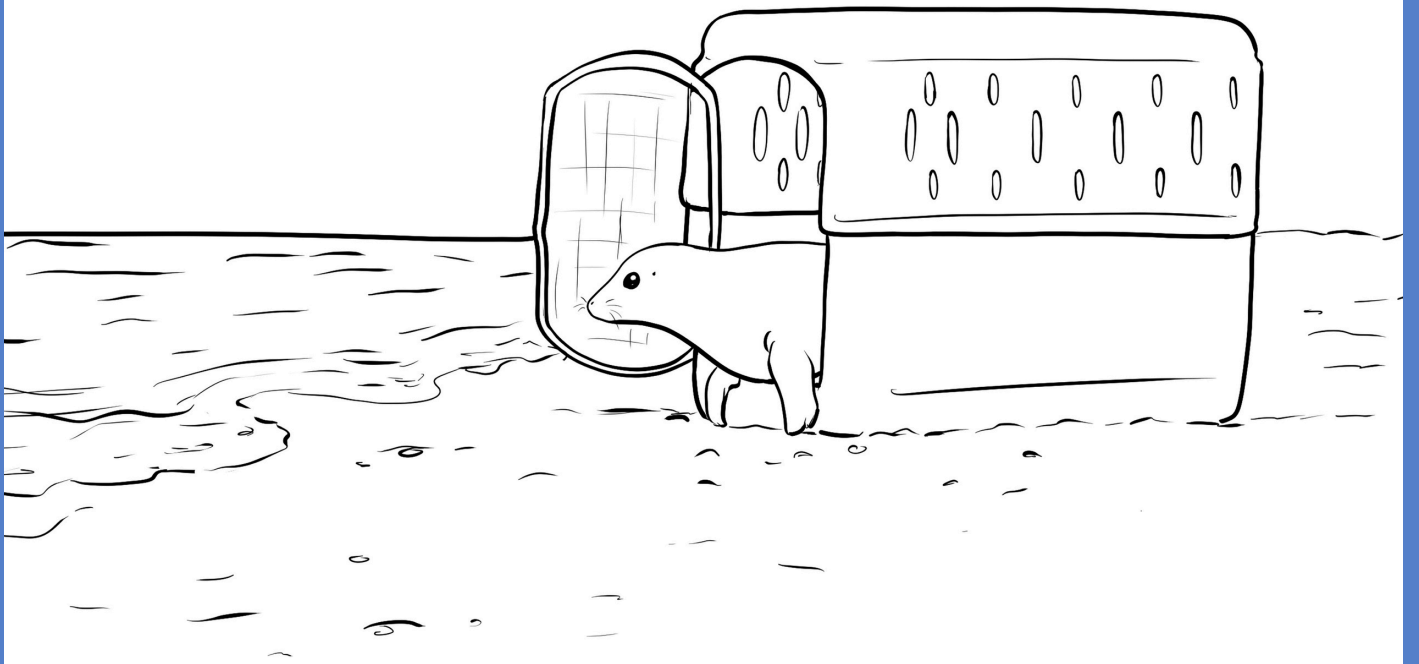

**If you think a seal is in trouble,
keep your distance and tell
an adult right away.**

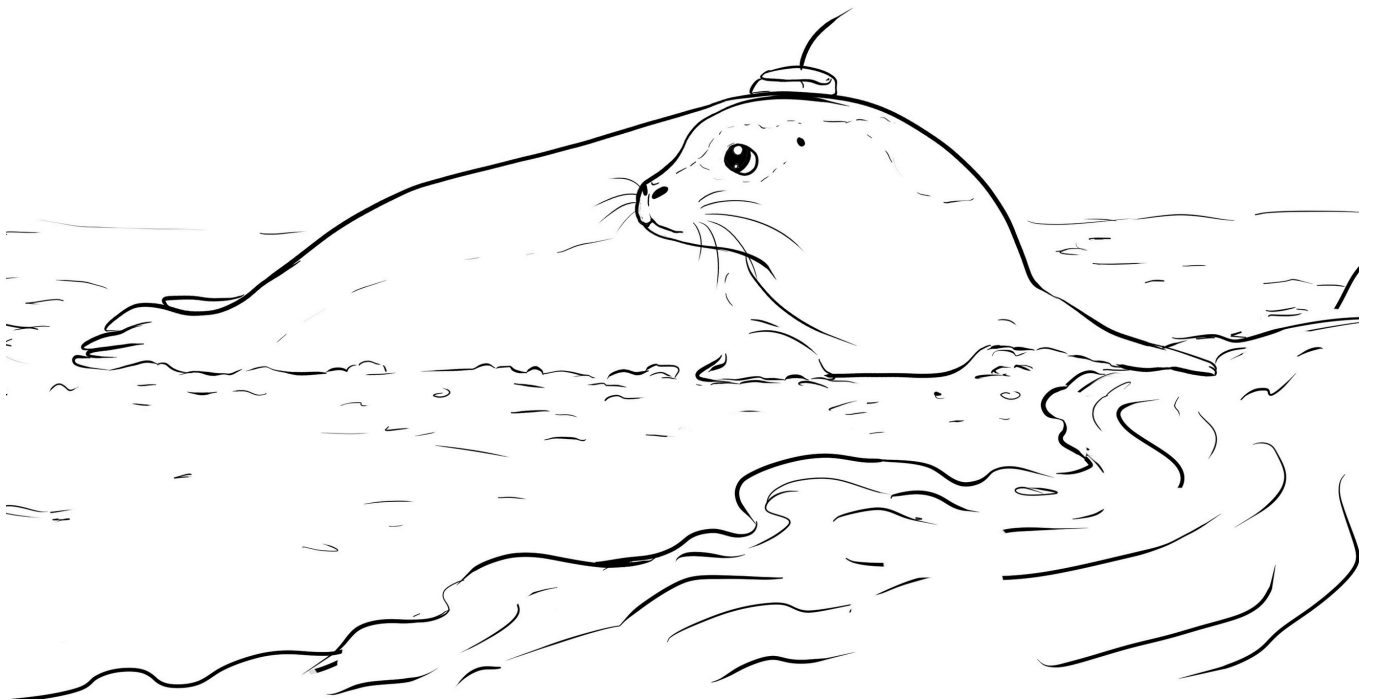

**Rescue workers trained
to help seals can come to help!**

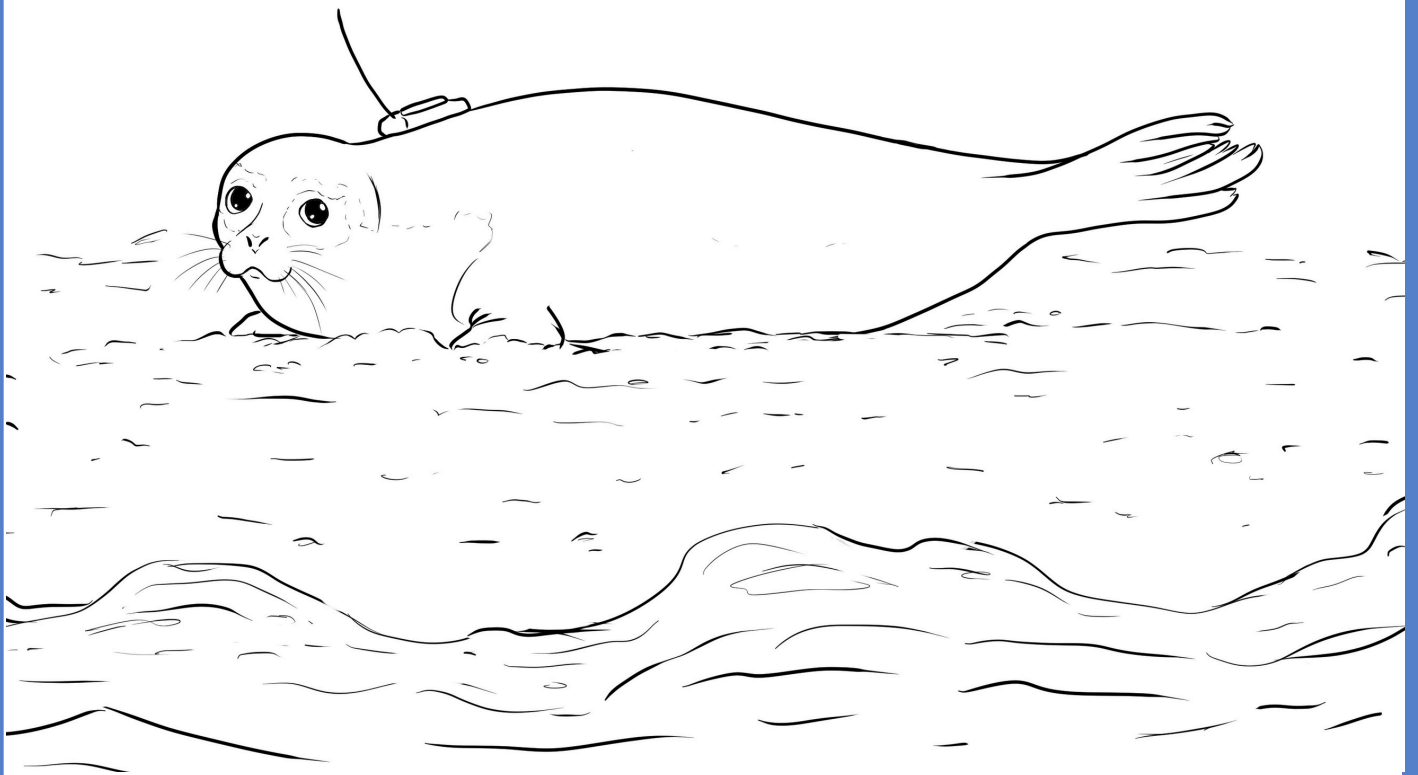

Sometimes seals are taken to special animal hospitals, and released back to the ocean when they are healed.

**They may even have special
trackers placed on them so
scientists can see where they go!**

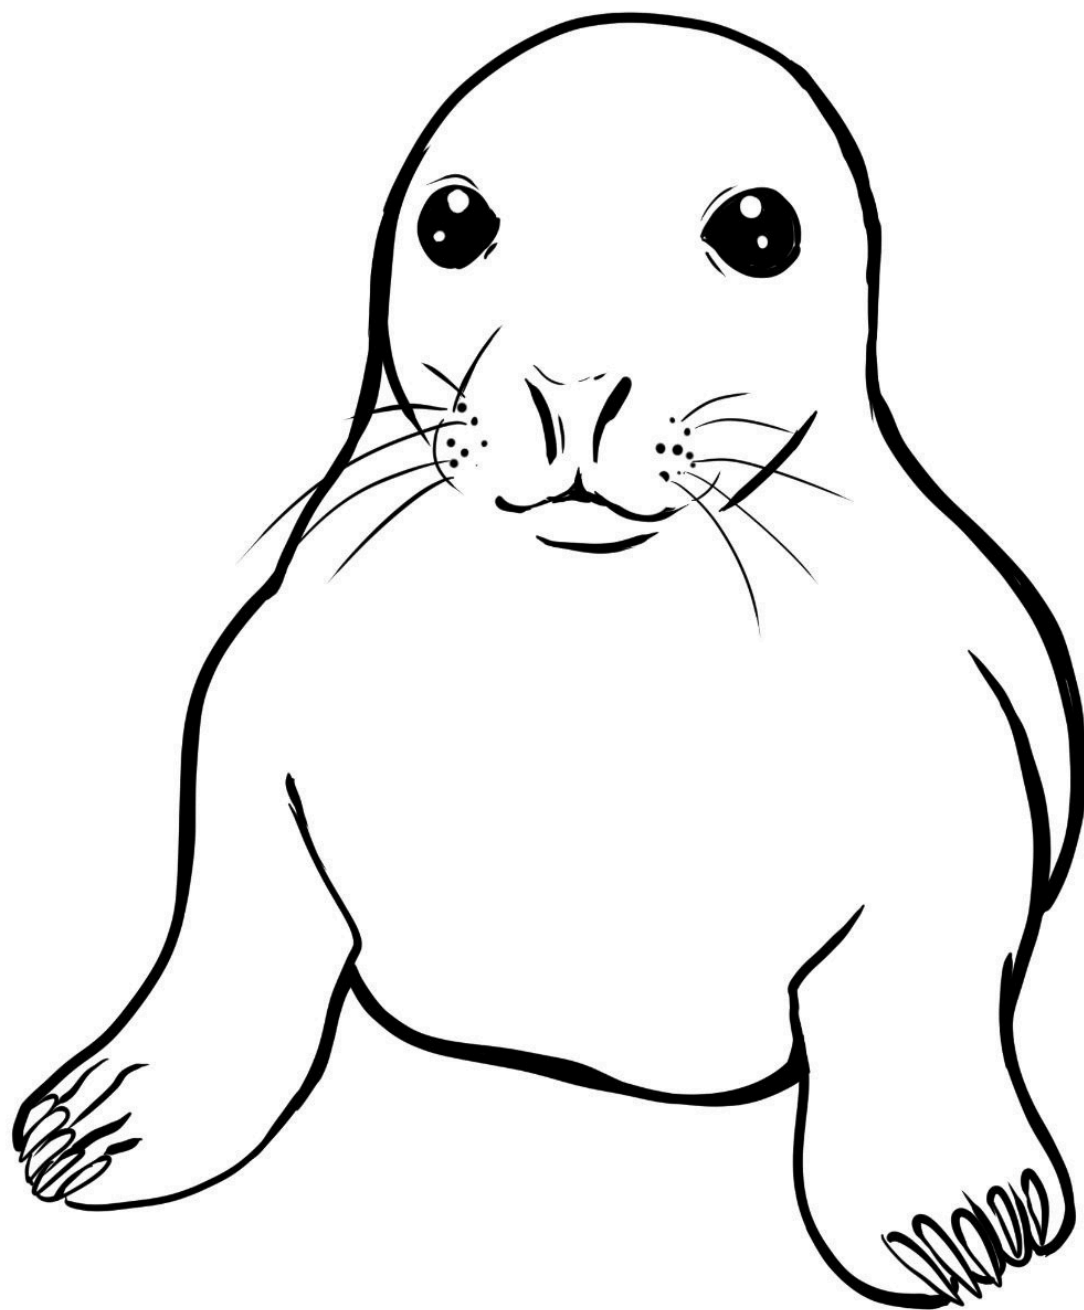

Safe seals are happy seals!
